Thanks Holly. Our Public Affairs office got some language from Travis Loop. I can forward what he sent if you've not seen it. AP published an article yesterday afternoon. It's very CA-focused, which is probably not surprising given that the AP reporter who wrote it has closely followed our Class II issues out here. I can forward the AP article also if you haven't seen it.

Thanks,

David

Hi David,

I've attached the current version of the GAO letter. Changes from the version you've seen

include OGC's edits. No others have come in. It is under review by my management and OECA so could still change a little.

We did not develop a desk statement. Feel free to take anything useful from the letter- it's all stuff we've said publically. In an article in USA today this week, an EPA spokesperson (unbeknownst to me) basically took response letter language to respond:
<http://www.usatoday.com/story/news/2016/04/12/report-epa-lax-protecting-drinking-water-energy-waste/82931146/>.

Let me know if this works or if you need more.

Holly
